

# DEPARTMENT OF CHILD & ADOLESCENT HEALTH

*Departmental Report August 2020 - July 2021*

**Roxanne Melbourne Chambers** · **Head**  
*MBBS (Hons), DM (Paeds)*

## WORK OF THE DEPARTMENT

The Department of Child and Adolescent Health continues to strive towards excellence in clinical service, research, intellectual leadership, advisory and community services and training of undergraduate students and postgraduate doctors. The academic staff is comprised of four professors, two senior lecturers and three lecturers as well as six associate lecturers University Hospital of the West Indies (UHWI)) and twenty-four associate lecturers in affiliate clinical training sites who support teaching and assessment of medical students in five public hospitals. There are two members of administrative staff and one office attendant. In-patient clinical services are delivered through two paediatric medical wards and a newborn special care unit which includes a neonatal intensive care unit. In July 2020, a neonatal high dependency unit was established at the UHWI to receive admissions of neonates infected and potentially infected with SARS CoV2. Out-patient clinical services are delivered through general and sub-specialty clinics in adolescent medicine, cardiology, development and behaviour, endocrinology, haematology and oncology, infectious diseases, neonatology follow-up, nephrology, neurology, and pulmonology and a Paediatric Casualty. In February 2021, a Paediatric Gastroenterology Out-Patient Clinic and In-patient Paediatric Gastroenterology service were established after the employment of a Paediatric Gastroenterologist who returned to Jamaica after completing Fellowship training in June 2020.

The Department offers two undergraduate courses as part of the MBBS programme, the 4-week Junior Clerkship in Paediatrics (part of the Aspects of Family Medicine course) in year 3 of the MBBS programme and the 10-week Senior Clerkship in year 5 of the MBBS programme. There were 266 junior students and 301 senior students who completed the Child and Adolescent Health rotations over the last year. There is a postgraduate programme in Paediatrics (Doctor of Medicine in Paediatrics) with students registered in Jamaica and in the Bahamas. There were 58 postgraduate students registered in the DM Paediatrics programme during the academic year 2020-2021. Forty-four students were registered in Jamaica and 14 students were registered in the Bahamas. The Department also offers a fellowship in Neonatology. This programme was recently revised to increase its length from eighteen to 24 months. One student enrolled in the programme starting July 1, 2021. There is also the post-graduate diploma in Loss Grief and Trauma Management. Eight students completed the programme in 2020-2021 and the post graduate Diploma in Adolescent Health and Advocacy, six candidates successfully completed the Diploma in June 2021. Faculty of the Department also teach courses in child and adolescent health related areas and provide research and clinical supervision to students enrolled in undergraduate programmes in Nursing and Midwifery and postgraduate programmes in Biomedical Research, Clinical Psychology, Education, Nutrition, Family Medicine, Epidemiology and Public Health. The COVID 19 pandemic necessitated a continued review of the delivery of teaching, learning and assessment in order to reduce student exposure and risk of acquiring SARS CoV2 infection in the health care setting.

## ACCESS

- Efforts made to enhance the quality of teaching, learning and student development

1. The Intern Tutor Programme. During the academic year 2020-2021, to enhance the clinical skills training of medical students in the Junior clerkships in Paediatrics of the MBBS programme and also to support continued training of interns who completed their clinical training in the MBBS during the pandemic that limited their clinical exposure, the Department in association with the Health Professions Education Unit instituted the Intern-Tutor Programme.

The objectives were to optimize the interns' knowledge, competency, and practice of common paediatric skills given the Covid-19 challenges, develop problem-solving compe-

tence in common paediatric clinical presentations using a case-based approach, To train interns as tutors for instruction in paediatric skills using simulated patients and specified equipment and implement a training curriculum to fulfill the extended roles as Intern-Tutors (<https://drive.google.com/file/d/14xi5wb2usNDfyTNoonLsygZ2US3IcrOc/view>). Participating interns were recognised by a certificate of participation at the end of the three months as part fulfilment of the requirement for the Paediatric internship rotation. This innovation was rated highly by participants.

2. Guest Lecture Series on the care of the high-risk neonate by the staff and lecturers of Joe DiMaggio Hospital, Florida, September 2020 to DM Paediatrics residents at Mona and sister campuses
3. Ventilation Workshop – Developed and executed a comprehensive workshop on Mechanical Ventilation of the Neonate for Paediatric Residents in the DM programme, which will provide residents with an understanding of respiratory physiology, the fundamentals of mechanical ventilation and empower them to tailor the ventilatory strategies appropriately to the underlying pathophysiology, thereby improving patient outcomes. Led by Drs. Jillian Lewis, Blondel Crosdale and Dr. Brian James.
4. Statistical analysis workshop. The Department led by Dr. Jillian Lewis nurtured a partnership with the Jamaica Statistical Society to provide Data Analysis training for over 60 residents and lecturers in the DM Paediatrics, Obstetrics and Gynaecology and Paediatric Surgical programmes from Jamaica and other Caribbean islands over six weeks, February 2021.
5. Dr. Lewis re-established the Neonatal Fellowship Training with a revised curriculum and extended overseas experience. This program seeks to provide Neonatal trainees with a foundation in the comprehensive management of the critically ill neonate with the hope that the expertise acquired will contribute to improved management of neonates in the community, with a resultant impact on the morbidity and mortality in this population locally and regionally.
6. Executed, in collaboration with the Jamaica Statistical Society, a Statistical Data Analysis training program for Residents in the DM Paediatrics, Obstetrics and Gynaecology and Paediatric Surgical programmes, February to April 2021. This aligns well with the Triple A 'Access' strategy which focuses on positing the institution to be the University of choice by improving the quality of teaching, learning and student development.

7. Established a Paediatric Resuscitation Committee which seeks to provide oversight for the implementation of resuscitation guidelines, training of health care personnel in Neonatal and Paediatric Resuscitation, assessment and maintenance of competency of staff in Neonatal and Paediatric Resuscitation. This particular initiative addresses a need for the establishment of guidelines and standards for recognizing the deteriorating patient early and instituting appropriate measures to prevent morbidity and mortality. This will result in improved expertise and competence in this area of Neonatal and Paediatric care and presents an opportunity for both qualitative and quantitative research.
8. Collaborative academic presentations in the DM Paediatrics programme involving sister campuses in the Bahamas and at Cave Hill and St. Augustine. These were presented virtually and included lectures from guest faculty from Vanderbilt University, the Hospital for Sick children, Canada and Joe di Maggio Children's Hospital, USA.
9. Global Health Initiative. Telemedicine meetings held with West Virginia University in Collaboration with the Cornwall Regional Hospital. Residents, fellows and students shared interesting cases and research focused on COVID and other infectious diseases September 2020 – April 2021
10. Professor Russell Pierre, the University Examiner for the DM Paediatrics Programme facilitated Cross Campus Examiners consultations to enhance the harmonization of the DM Paediatrics Programme across the campus sites in the FMS; oversaw the administration of the virtual DM clinical/oral examinations Nov/Dec 2020 and May/June 2021.
11. Drs Abigail Harrison and Andrea Garbutt, lecturers, executed the virtual DM Clinical/ Oral Examinations Nov/Dec 2020 and May/June 2021 across four campuses and with the participation of the External Examiner domiciled in Scotland. These activities included examiner and candidate training and mock examinations for all participants using the virtual space.

- Innovations to Improve Access

Pierre RB, Director of Medical Education, Faculty of Medical Sciences, Health Professions Education Unit, FMS 2020 – to date Overall aim: The promotion, development, implementation and monitoring of health professions' education initiatives with special emphasis on faculty and staff continued professional development, research in health professions education, accreditation and quality enhancement, curriculum development, and interprofessional collaboration

## **Achievements [August 2020 to July 2021]**

- Implementation and conduct of Faculty Development Workshop [Administration of On-line Clinical Examinations: a primer for the DM Programme Virtual Clinical Examinations – 29 attendees of 35 registered participants; rated overall 4.5 [rating scale 1 (poor) to 5 (excellent)]]
- Online access to archived Faculty Development Workshops [Managing your Online Quiz; Item-writing]

2. Non UGC (self-financing programme – 8 new students – \$3,200,000.00): Post-graduate diploma in Loss Grief and Trauma Management, Department of Child and Adolescent Health, Faculty of Medical Sciences, UWI, Mona. Coordinator: Professor A. Pottinger

## RESEARCH GRANTS

1. PI (local site): Abigail Harrison (Subaward agreement with Johns Hopkins University)  
Source: United Nations Childrens Funds (UNICEF)

**Project title: Adolescent Mental Health Focus Groups Funds: USD 5060.**

2. Christie CDC. Principal Investigator, UWI (and other international and local co-investigators).

Source: European Commission and Paediatric European Network for Treatment of AIDS (PENTA) Foundation

**Title:** "Addressing the urgent research gaps against the Zika virus and other emerging threats in Latin America, SC1-PM-22-2016. Leader of WP1 – Vertical Transmission of ZIKV".

Grant Period: 2016 to 2021 (five years).

Additional Funding to UWI for a Total Amount of 924,121.81 Euros

3. Christie CDC. Principal Investigator UWI (and many other international co-investigators).

Source: PENTA Infectious Diseases Foundation, Italy.

**Title:** "ZIKA App – A cell phone-based intervention for early detection of arbovirus infections in pregnant women in Jamaica", to UWI.

Grant period: Jan 2020 to May 2021

Grant amount: Funded for 70,723.52 Euros (subsumed in major ZIKAction Grant)

4. Samms-Vaughan M. Principal Investigator

Source: Canada Fund (Canadian High Commission)

**Title:** Supporting the Development of Children with Disabilities

Grant Period: 23/07/2020-28/02/2021

Total cost: CDN \$25,000.00

5. Christie CDC. "Person of Interest"

Sub-Lead investigators: Drs Crista-lee Berry (with many others)

Source: Centers for Disease Control and Prevention, USA

**Title:** COVID-19 in hospitalized children at the UHWI, Jamaica and in the Caribbean.

Grant Period: August 14, 2020 through September 30, 2021.

Grant amount: Funded for \$70,000 USD's

6. Christie CDC: Co-investigator, (P.I. is Prof Gene Morse)

Source: National Institutes of Health, USA

**Title:** "Fogarty International Training and Research in Virology at UWI", collaborating with University of Buffalo, New York, USA

Grant period: 5 years, began 2018.

Grant amount: Funded for \$1.1 Million USD's to UWI

7. Melbourne-Chambers R: Sub P.I., UWI/ Jamaica Site (with several co-investigators).

Source: European Commission

**Title:** "ZIKA Pediatric Registry". Addressing the urgent research gaps against the ZIKA virus and other emerging threats in Latin America, SC1-PM-22-2016."

Grant Period: 2016 to 2021

Grant amount: 33,000 Euros (subsumed in major ZIKAction grant).

## **OTHER INITIATIVES**

1. Dr. Jillian Lewis participated in the International Perinatal Outcomes in the pandemic study (iPOP) study which seeks to seize on the unique opportunity offered by the COVID-19 pandemic to answer urgent questions about perinatal health. This study specifically seeks to ascertain the impact on the pandemic and attendant changes in access to health care on perinatal care and outcomes. This collaboration provides an

- opportunity to expand the research armantarium of the Department, provide some insight into the Jamaican experience, and may bear opportunities for future collaboration.
2. Collaborated with Dr. Earnest Pate (Neonatologist), Pan-American Health Organization, Inter-American Development Bank, Planning Institute of Jamaica and the Ministry of Health, Jamaica and an interdisciplinary team from the UHWI to develop a set of protocols to govern aspects of Neonatal care geared towards Infection prevention and reducing the attendant morbidity/mortality. Education of the staff and stakeholders at the University Hospital of the West Indies is ongoing and will hopefully result in improved care delivery to patients and parent/stakeholder experience and satisfaction. A Research committee has been established to study the impact of these protocols on various aspects of Infection Prevention, Patient outcomes and Parent satisfaction. The first of many research proposals was submitted for ethical review in 2021 and work is ongoing on the others.
  3. Participated in the inaugural National Perinatal review which sought to share and examine local data on the perinatal experience in Jamaica, with a view to identifying gaps and developing guidelines in response. The opportunity was also utilized to highlight and celebrate strengths and the University Hospital of the West Indies won many awards at this event in recognition of its focus on education on Neonatal resuscitation and regular perinatal mortality reviews.
  4. Represented the Caribbean region on the World Federation of Paediatric Critical Care Society Physician Education Subcommittee which was established to focus on and improve Paediatric Critical Care education in low and middle income countries. This decision seeks to respond to the first of the Triple A strategies, which focuses on improving access to quality tertiary education
  5. Established a research group with representation across the island of Jamaica, to review the experience in Transport of critically ill neonates, with a view to developing guidelines and providing recommendations for the optimal transfer of our patients. This initiative is necessary and has the potential to improve the morbidity and mortality of our most vulnerable patients.
